

The Next Generation Oil Filter

## THE OIL FILTER THAT PAYS YOU BACK

- ⊙ Reduce oil change costs by up to 50%
- ⊙ Superior oil flow for faster protection at start-up and idle
- ⊙ Breakthrough filtration to keep your oil cleaner, longer
- ⊙ Optimized contaminant storage
- ⊙ Cleanable & reusable; eliminate used filter disposal
- ⊙ Uniquely engineered mounting plate 
- ⊙ Two pressure differential valves for unequalled flow management 
- ⊙ Filter-in-a-filter forged from surgical stainless steel 

FLEET

# Reduce oil change costs up to 50%

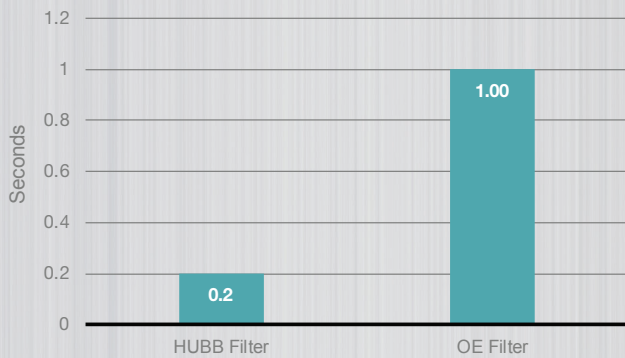

Oil Change costs include oil, oil filter, filter disposal or cleaning and labor based upon industry standard costs; fleet consists of 700 class 1-4 vehicles and 300 class 5-6 vehicles

HUBB Cost Savings for 1,000 Vehicle Fleet

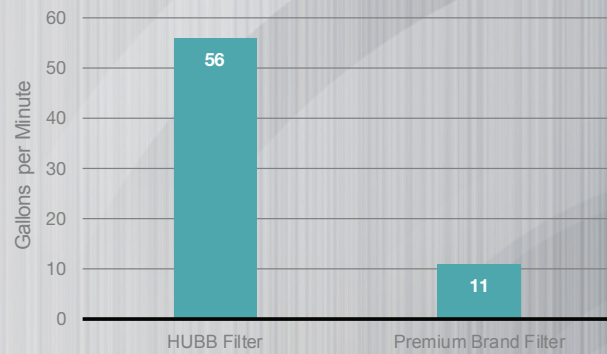

# Faster protection at startup and idle

Time to Recommended Oil Pressure

**Faster Time to Pressure = Reduced Engine Wear**  
The HUBB Filter has been specifically engineered to achieve oil pressure faster at start-up.

Oil Flow

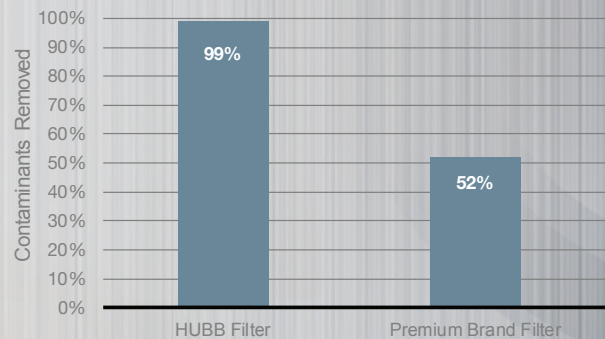

**Better Oil Flow = Better Protection**  
The HUBB Filter has been specifically engineered to reduce friction by increasing oil flow by as much as 5X over a conventional oil filter.

# Breakthrough filtration keeps oil cleaner, longer
